Teledyne RD Instruments Has Been Awarded ISO 9001:2008 Certification

(March 5, 2009 – San Diego, Calif.) Teledyne RD Instruments announced today they achieved the ISO (International Organization for Standardization) 9001:2008 certification from Det Norske Veritas. Teledyne RD Instruments is one of a select number of companies to meet the stringent ISO 9001:2008 certification requirements.

The ISO 9001:2008 certification demonstrates Teledyne RD Instruments' commitment to quality for the design, manufacturing, and service of Acoustic Doppler Current Profilers (ADCPs) and Doppler Velocity Logs (DVLs) for the marine market.

In accepting the registration certificate, Javier Costas, Teledyne RD Instruments Quality Manager stated, "Receiving and maintaining ISO 9001:2008 certification requires continuous process improvement aimed at achieving total customer satisfaction. We have been aggressively focused on developing and delivering quality products. Teledyne RDI's achievement is the direct result of a high level of commitment from the entire Teledyne RDI team and our overall commitment to quality. This major milestone is critical because our customers correctly view ISO 9001:2008 certification as a way of ensuring the quality and reliability of our products in the marketplace."

ISO (International Organization of Standardization) is the source of the ISO 9000 and ISO 14000 families of quality and environmental management standards and some 15000 International Standards for business, government and society.

Teledyne RD Instruments remains the industry's leading manufacturer of Acoustic Doppler Current Profilers (ADCPs) and Doppler Velocity Logs (DVLs) current profiling, waves measurement, and navigation applications.
